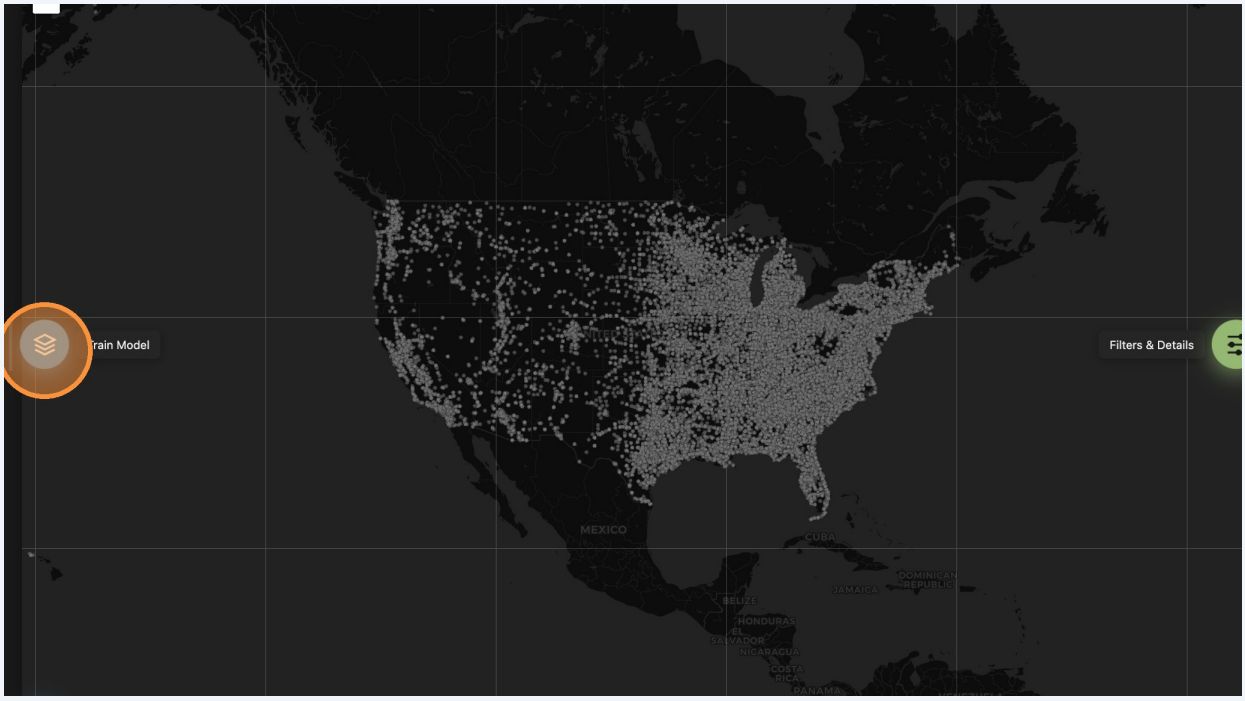
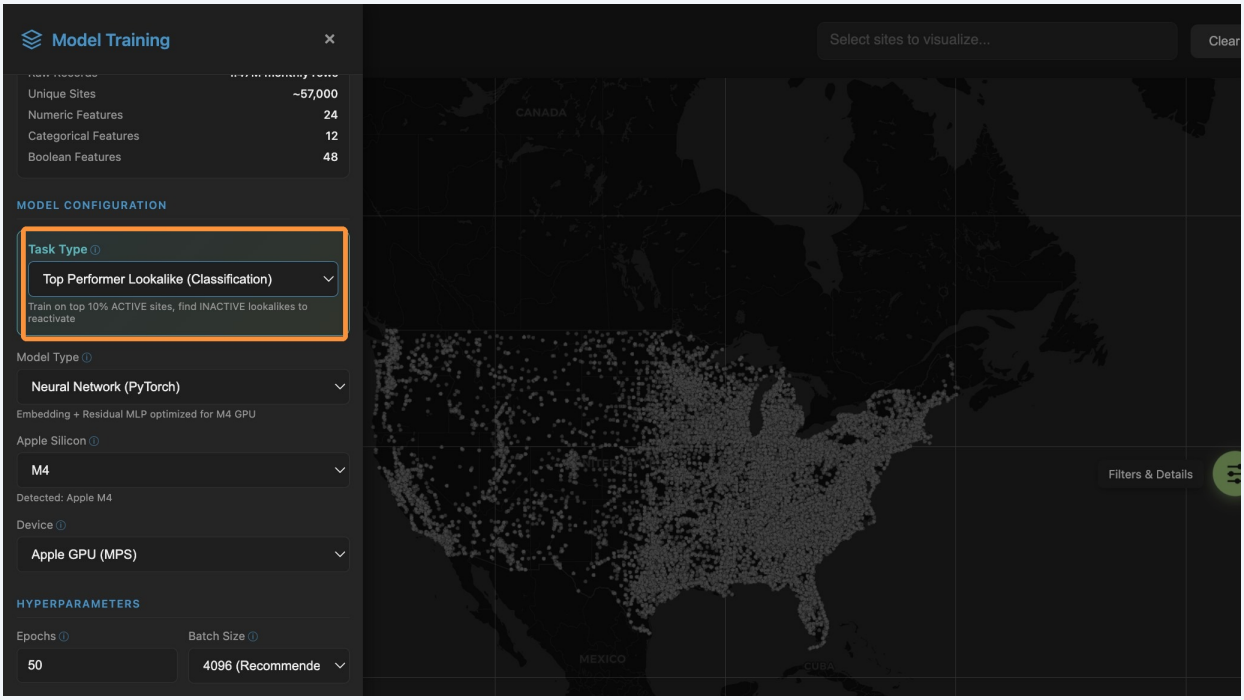
Train a Top Performer Lookalike Classification Model

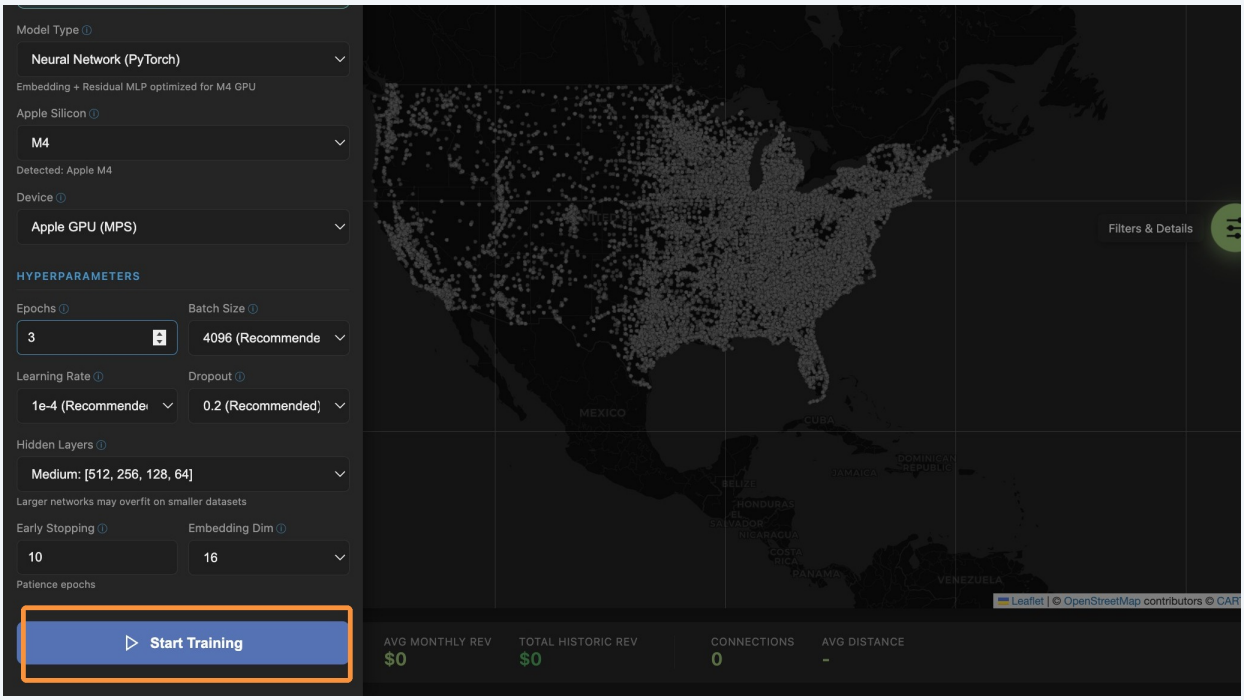
1 Select train models to view available machine learning models



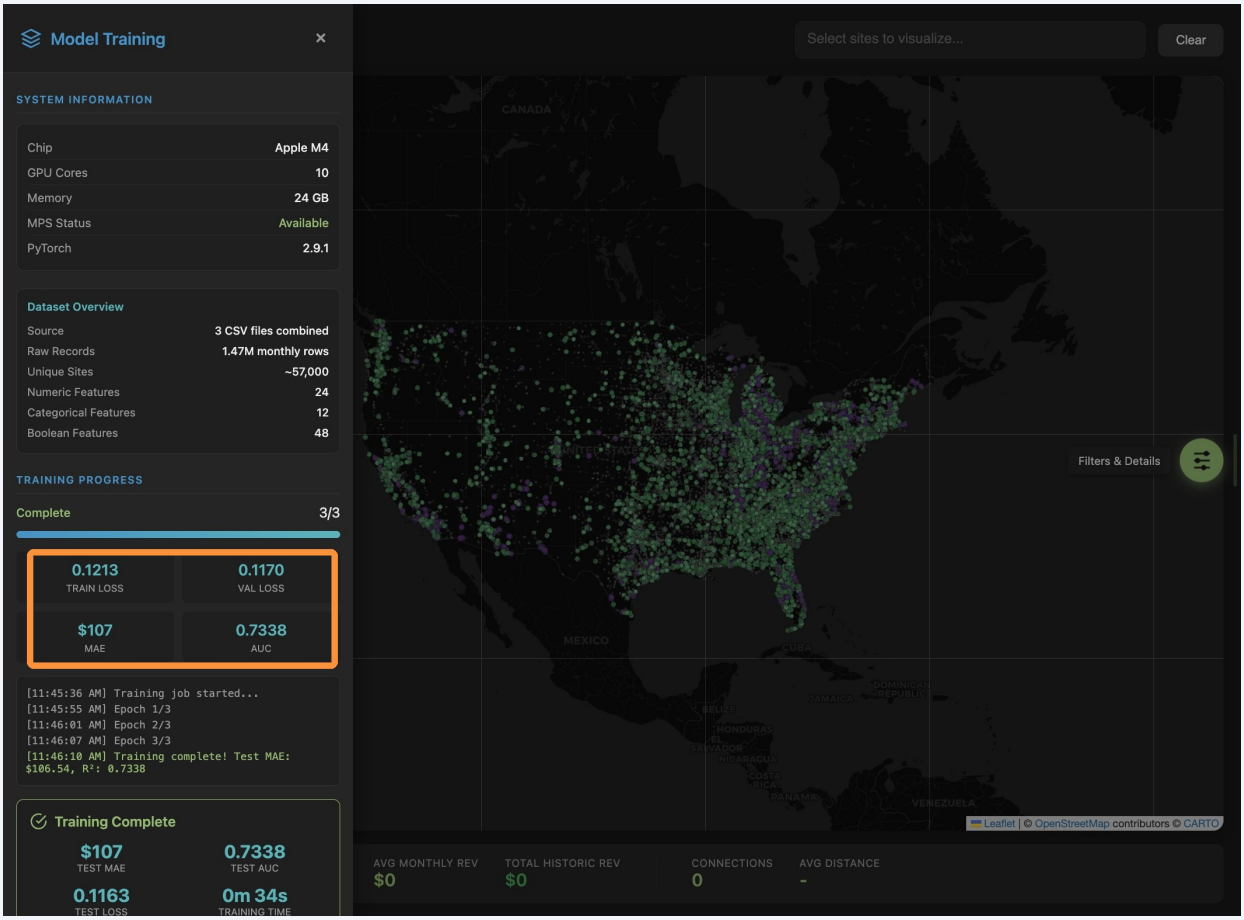
2 Chose between Regression modeling and Top Performer Lookalike (Binary Classifcation)



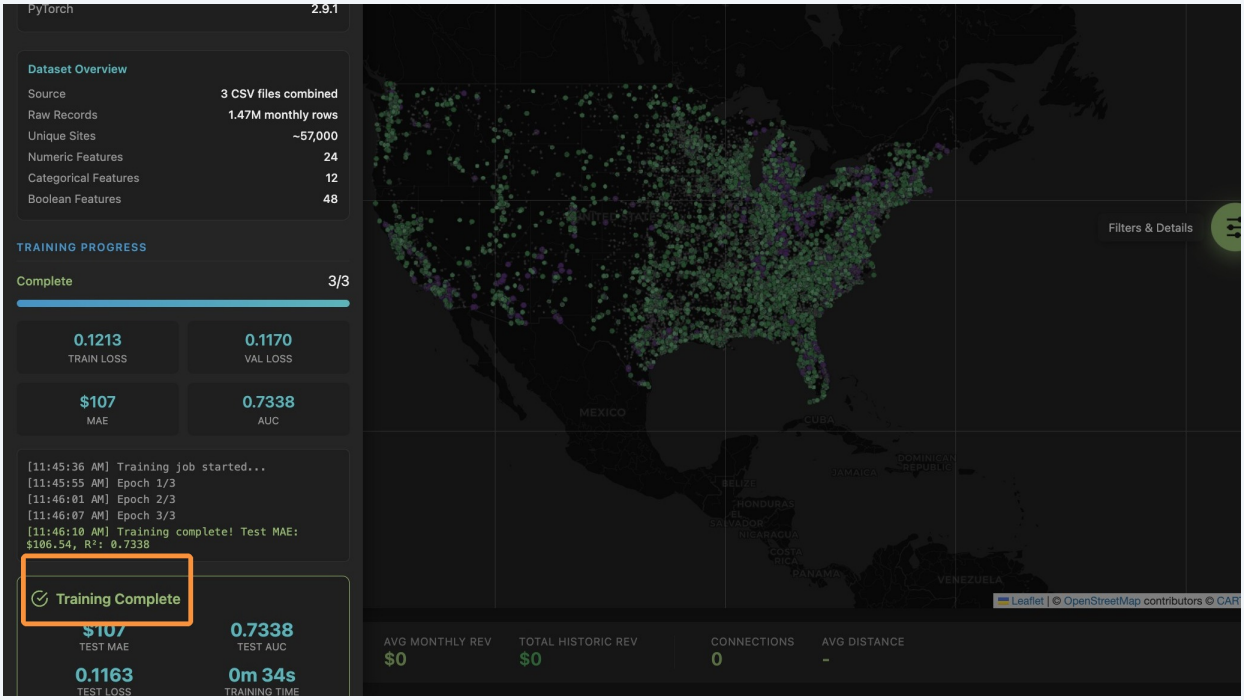
3 Click "Start Training"



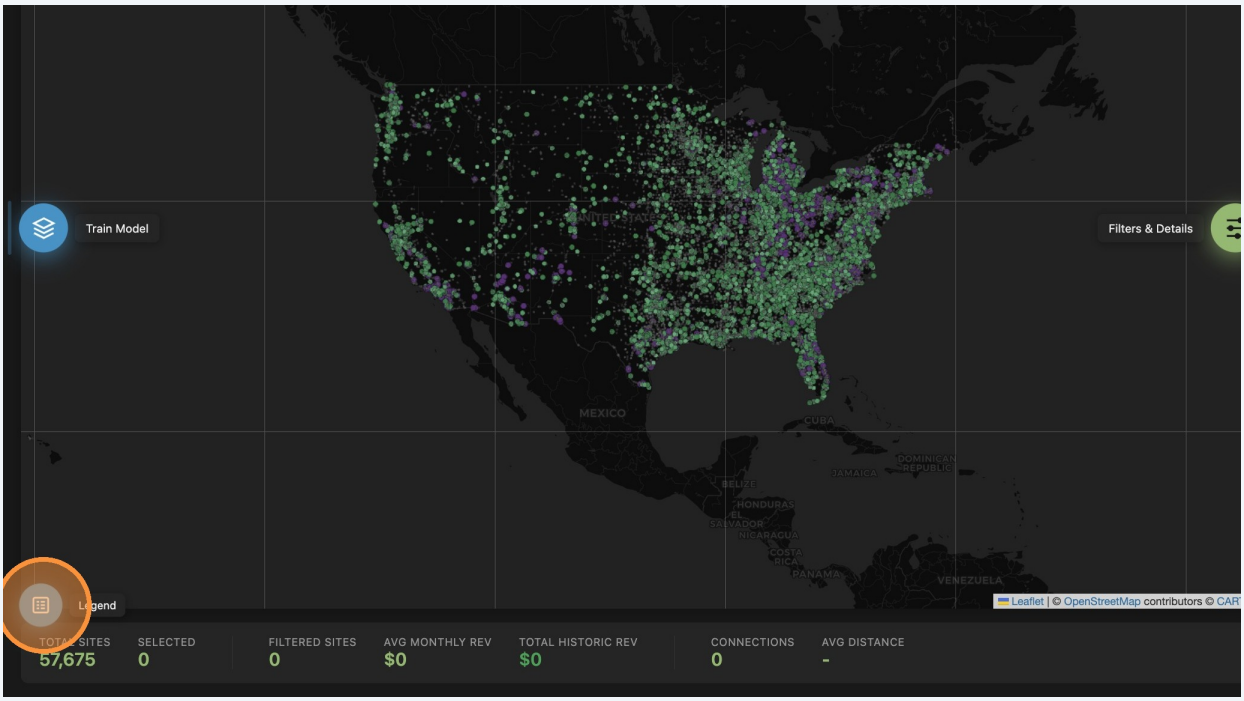
4 Training metrics update as training occurs.



5 Wait for training to complete



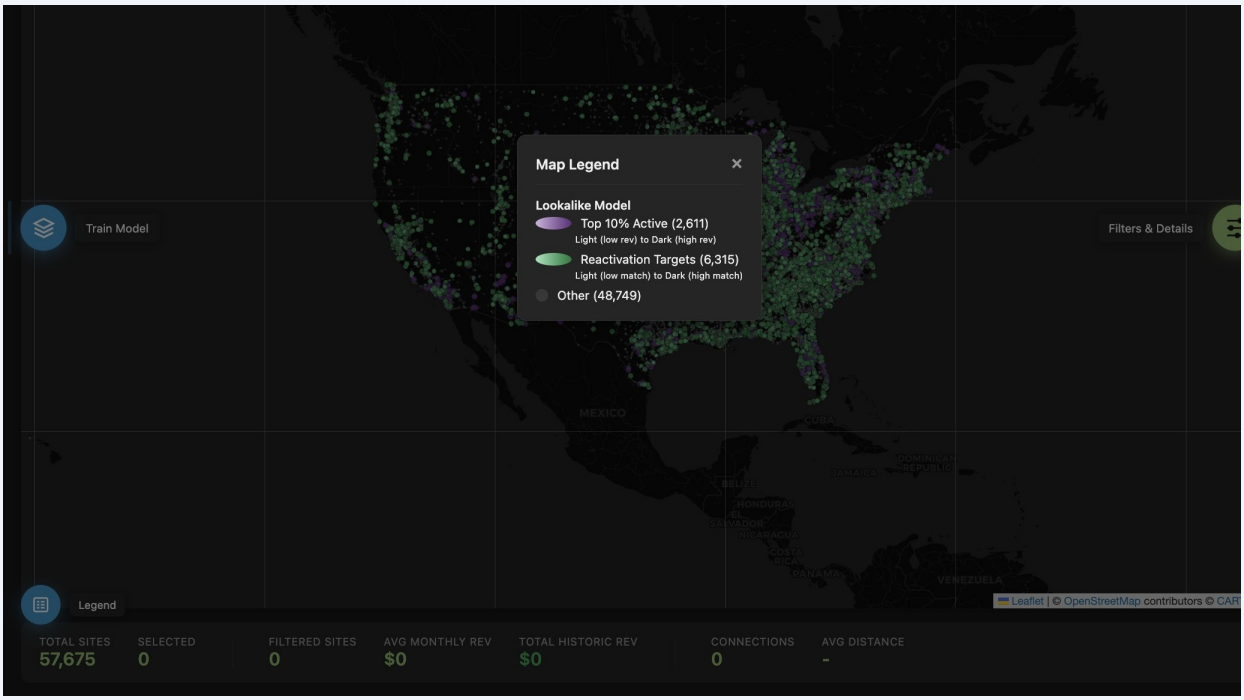
6 After training, view the legend to see what the points on the map represent



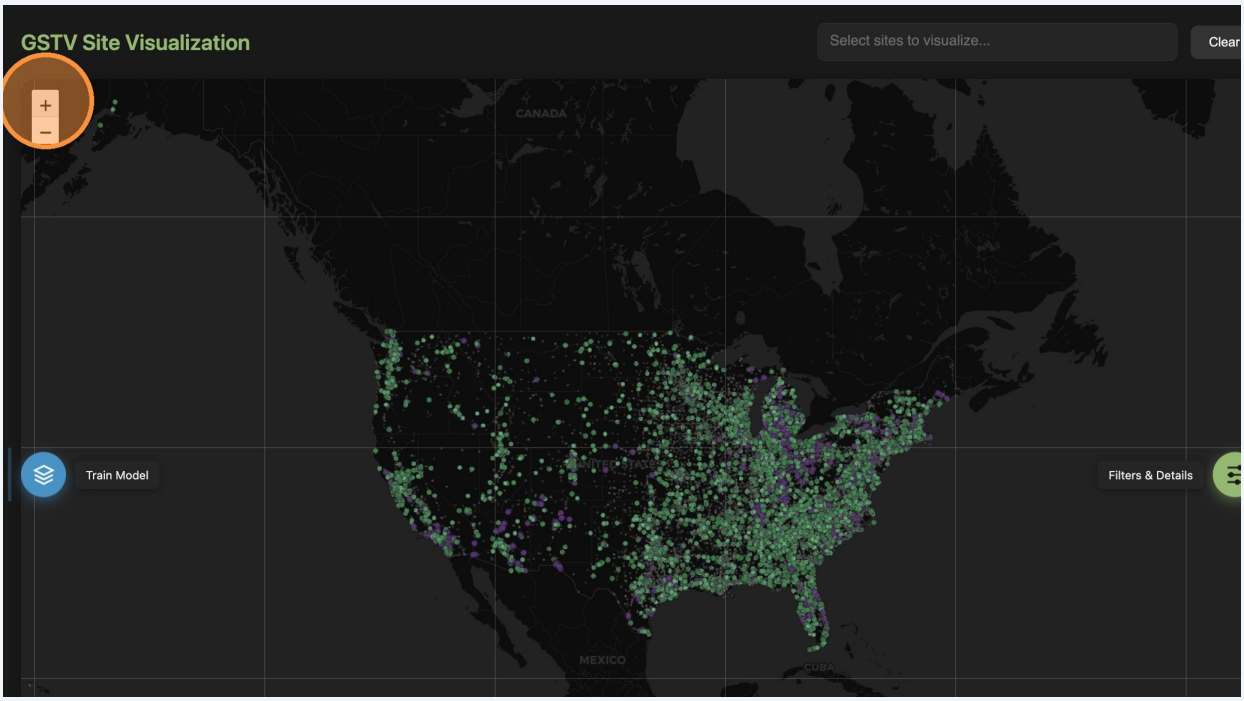
7 Map Legend:

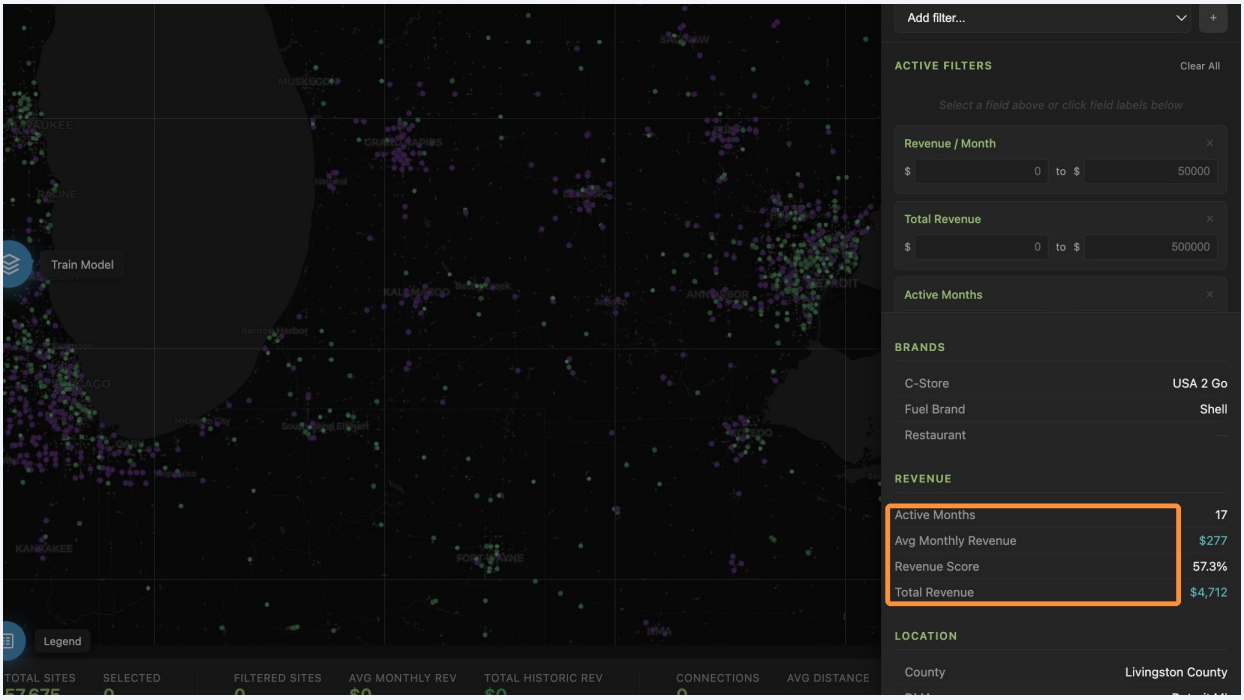
The clustering model output will create 2 sets of sites on the map:

Purple - Lookalike Model Top 10% Active
Green - Reactivation Targets



8 Zoom in to see sites better





9 The menu on the right will display metrics and Salesforce site characteristics
